

CHANGE REQUEST

<Spec#>28 CR 1380 rev - Current version: 19.1.0
8

For **HELP** on using this form: comprehensive instructions can be found at
<http://www.3gpp.org/Change-Requests>.

Proposed change affects: UICC apps ☐ ME ☐ Radio Access Network ☐ Core Network ☒

Title:	General maintenance of KI#4	
Source to WG:	ZTE	
Source to TSG:	<Source_if_TSG>	
Work item code:	AIML_CN	Date: 2024-12-30
Category:	F Use <u>one</u> of the following categories: F (correction) A (mirror corresponding to a change in an earlier release) B (addition of feature), C (functional modification of feature) D (editorial modification) Detailed explanations of the above categories can be found in 3GPP TR 21.900 .	Release: Rel-19 Use <u>one</u> of the following releases: Rel-8 (Release 8) Rel-9 (Release 9) Rel-10 (Release 10) Rel-11 (Release 11) ... Rel-15 (Release 15) Rel-16 (Release 16) Rel-17 (Release 17) Rel-18 (Release 18) Rel-19 (Release 19)

Reason for change:	NWDAF can collect data from NRF and SCP for signalling storm analytics as defined in clause 6.22 of TS 23.288, but these are absence in clause 4.1.
Summary of change:	Adding agreed data collection source of NWDAF.
Consequences if not approved:	Misalignment exist

Clauses affected:	4.1

This CR's revision history:	
-----------------------------	--

***** Start of Change *****

4.1 General

The NWDAF (Network Data Analytics Function) is part of the architecture specified in TS 23.501 [2] and uses the mechanisms and interfaces specified for 5GC in TS 23.501 [2] and OAM services (see clause 6.2.3.1).

The NWDAF may support the following functionalities:

- Data collection based on subscription to events provided by AMF, SMF, UPF, PCF, UDM, NSACF, AF (directly or via NEF), [NRF](#), [SCP](#) and OAM;
- Analytics and Data collection using the DCCF (Data Collection Coordination Function);
- Retrieval of information from data repositories (e.g. from UDR via UDM for subscriber-related information or optionally via NEF(PFDF) for PFD information);
- Data collection of location information using LCS (finer granularity location information determined by LMF);
- Storage and retrieval of information from ADRF (Analytics Data Repository Function);
- Analytics and Data collection from MFAF (Messaging Framework Adaptor Function);
- Retrieval of information about NFs (e.g. from NRF for NF-related information);
- On demand provision of analytics to consumers, as specified in clause 6.
- Provision of bulked data related to Analytics ID(s).
- Provision of Accuracy information about Analytics ID(s).
- Provision or retrieval of ML Model Accuracy Information or ML Model accuracy degradation about a ML Model.
- Vertical Federated Learning.

***** End of change*****
